CloudVeil

CLOUDVEIL FOR SCHOOLS

Classroom PCs that stay on task

Fully lock down your Windows student computers: limited to the websites and apps they need, enforced by our school server, with permanent remote support from our team.

HOW IT FITS TOGETHER

CloudVeil Router

Connects your school to the CloudVeil School Server and filters the whole network.

A license for each PC

Your school supplies the Windows 10/11 Pro computers. Each one needs a Student Device Management License.

We manage it remotely

Restrictions are set and kept up to date from our server. No software for you to maintain.

Why it stays reliable

Windows Professional has powerful management and lockdown tools built in, the same ones businesses have used for decades. We turn them on and enforce them from our School Server. Because the restrictions are part of Windows itself, updates don't break them, and there's no extra filtering software slowing the PC down.

What students get

- ✓ Settings, Control Panel and Windows Store locked down
- ✓ Only approved websites, in any browser
- ✓ Microsoft Office and most learning apps
- ✓ Windows and Office updates managed
- ✓ A staff account with full admin access
- ✓ Start menu, taskbar and desktop locked
- ✓ Blocks other ways online, like hotspots
- ✓ Online or offline typing courses
- ✓ Staff and student file sharing, set up for you
- ✓ Low CPU use, and no antivirus to buy

SETUP

Two quick steps. We handle the rest.

1 YOU
Order
A license for each PC, plus a CloudVeil Router.

2 YOU
Install our support tool
On each classroom PC. That's it. Your part is done.

3 CLOUDVEIL
We set everything up
We link each PC to the School Server and apply your restrictions.

✓ READY
Ready for class
Students sign in to locked-down PCs, and we stay on call.

Need to install software or change a setting? Sign in with your staff account, or ask us to lift the student restrictions for a while.

Pricing

PER COMPUTER
Student Device Management License
$40 USD / year
Plus a one-time $100 setup fee per computer. Includes server fees, maintenance and 30 minutes of technical support.

Router System Lite Router + Wi-Fi access point	**$350** one-time + $8.99/mo
Router System Max UniFi Gateway Max, 4 LAN ports + AP	**$450** one-time + $8.99/mo
Extra access point Extend Wi-Fi across the building	**$119**

Schools & churches save **ROUTERKIT** $50 off the router **ROUTER** filtering for $5.39/month

Prices in USD, current as of October 2026. Router prices shown before school discounts. Allow 2 to 4 days for router setup.

Not ready for student computers?

Start with the network. A CloudVeil Router System filters every device on your school's Wi-Fi and wired network, with no per-device fees. Add managed student PCs whenever you're ready.

Already have a router? CloudVeil DNS filtering can be added to most existing routers, from $8.99/month, but a CloudVeil Router gives you stronger enforcement. Router filtering doesn't replace filters on individual devices.

Before you start

- ☐ Internet access at the school. LTE and satellite connections work too.
- ☐ Windows 10/11 Pro on each PC (check Settings → About)
- ☐ A CloudVeil Router to connect to the School Server
